

CARMEN

SINCE 1850

INSIGNE

Chardonnay

2022

VARIETY: 85% Chardonnay | VALLEY: Central Valle
WINEMAKER:: César Catalán H.

WINEMAKER'S COMMENTS

This wine shows a very clean and bright golden yellow color. Sweet notes appear on the nose, with hints of honey and finally fruit. In addition, there are lactic notes, which come from the contact of this wine with 100% French oak. In the mouth, it presents a good weight and volume, but at the same time, it gives us a long and juicy wine.

CLIMATE AND SOIL

Chile's Mediterranean climate features warm, dry summers and cold, rainy winters. The proximity of the Andes Mountains plays an important role, and as the mountains rise in altitude, the temperatures drop.

The Pacific Ocean is also important to vineyard development. Chile's coasts have two great characteristics, their westward orientation and the cold Humboldt Current, which work together to create continental winds that have a cooling effect in the country's central zone and result in wines with higher acidity and elegant aromas.

The interaction between the effects of the Andes and those of the Pacific Ocean creates a broad daily temperature differential that helps the grapes develop fresh flavors and tremendous typicity.

The healthy, well-drained soils have a variety of origins (alluvial, colluvial, fluvial, etc.) and textures (marl, clay, sand, silt). Despite the relatively dry weather conditions, abundant water for irrigation flows from the eternal ice of the Andes Mountains.

VINEYARD

We use a combination of grapes from different vineyards, some of which are trellised to the traditional low vertical shoot position and others to modern systems such as Lira and Scott Henry. Regardless of the trellising system, different fruit load, and the amount of sun received, the objective is always to intensify the concentration in the fruit, maintain good acidity and respect the varietal character.

WINEMAKING

The preferred time to harvest the grapes is at night, while the fruit is cool. The grapes are then destemmed, very gently crushed, and pressed immediately. Some of the must obtained is protected against oxidation throughout the entire process, while others are fermented without protection to allow some oxidation for greater aromatic complexity, creaminess, and volume on the palate. Fermentation takes place with very clean (decanted) musts and at low temperatures to ensure varietal typicity and maximum fresh-fruit aromas.

TECHNICAL DETAILS

Alcohol: 12.9 % v/v

pH: 3.40

Total Acidity: 5.11 g/l.

Residual sugar: 2.35 g/l.

FOOD PAIRING

This wine can accompany fresh entrees or just as an aperitif. As a main dish, it can be paired with well-seasoned creams, pastas and heavy foods. Serve between 10-12°C
